The stone decided to disappear 😊

Also it can't be world edit as the water flow normaly so it must have been some server failure, you should check the plugins tunes 😊

Also, the server is VERY unstable.. it's crashing every 4-5 minutes.

Well, I have no idea, but I think it may come from sput plugin, most plugins need it... removed from the server atm.

Also the crashing, was proolly me, restarting it 😊
