

Just lost my whole inventory

Posted by TaloniusX - 15 May 2013 07:49

So, I broke my boat next to my island just now, and when I did, my entire inventory disappeared. Everything but the shirt on my back. A couple diamonds I think, but an entire stack of freshly killed pork chops, all my tools, sword, cobble, some ores, spider eyes...you get the idea. My inv was almost full. Could I possibly get at least some of it back please?

Well this is a first, and unfortunately there's no way to prove it happened, so my answer would be no, unless any other admin has anything to say about it

Unfortunately im going to have to agree with chif; we can't really give you back your inventory as we don't know what you actually lost Although i will happily give you the food and cobble and some tools from my supply 🍷

Sorry mate, breaking a boat and losing inv is not really a common thing, besides, if due to server crashes, the inv rolls back to the point where it was committed to disk and not lose only a few items.

Besides we have no idea what you had, so we cannot restore your inv.

Sorry about that.

Yeah, that's what I figured. Thought I'd ask though. I guess it makes sense, I could say I had 10 stacks of diamond blocks in there that I lost. Oh well. I know when the game has beaten me.
