

Servers

Posted by nuckyi - 07 Dec 2013 20:53

So we have 2 server up. One was just to mess around. and the other was waiting to get patch to 1.7.2. I was wondering which one was which.

Well, the one running at mc.twkgaming.com was put up just to mess around with 1.7.2, the one running at mcs.twkgaming.com is the official 1.7.2, which is at the moment, whitelisted.

I can whitelist you, is nucki your ign at mc?

You are whitelisted now 😊

And yes, I had an ftb installed and will proly start running one.

what would it take for a twk feed the beast server? I know me and sh4z would help. If its something to do with hardware like needing a bigger server i would be willing to help. 99% of the feed the beast servers i have found you have to buy rights to use alot of the ingame items. i did that once and like a month later the server shut down. let me know toons.
