Thanks guys 😊

I have a bit of a problem logging into the site. Thought i would post it here instead of making another thread.

Whenever i login, it says "not allowed to view this resource" or something of the like, then spits me back to the main page without appearing to log me in.

But once i click one of the buttons, i am logged in..

Any thoughts/solutions... Go for it.

EDIT: I dont know why, but it seems to have stopped now... Wierd!

I have an inkling on what is happening but I've not been able to replicate the problem on my home PC so I can't pin it down!

I'll have another look tonight 😊

I wouldnt worry about it too much. It doesnt look like a major issue. Then again it's always fun tracking down these little issues, especially if you fix it!

It's stopped doing it for me now, maybe it only affects new accounts for some reason?

This login issue *MIGHT* be fixed.

Might.
