Time to rock this boat. Best console ever is..\*drums\*..SEGA Megadrive!!! Cause all other modern consoles are watered down versions of a PC.

I mean with games like this who can disagree? 🤔

as usual xbox is tying with PS3.

Sony's argument is that you have to pay for Xbox Live.

my argument is that PSN has been down for a while, since I've had Xbox Live Gold, its never crashed or glitched on me. 24/7 support and maintenance.

All I can say is that PS3 and Xbox 360 are good in their own ways. PS3 beats Xbox 360 on some points, and vice versa. And I think it's unfair to put Wii in the vote as well because that's a completely different market 😊

Anyway, I vote 360 because i've had one for 2-3 years and it hasn't failed me, and I don't particularly like the PS3, and especially it's tiny controller ^^
