I listen to most kinds of music, right now I'm in a dubstep period 🙄

But since I play in a rock band I suppose it's essential I listen to rock as well ^\_\_^

Im what most ppl would call a all-eater. I like all sorts of music but not all music 🙄

I prefere metal, trance, synth, dubstep, folk, opera(if mixed with metal) and some prog. And I also LOVE game and movie soundtracks. Here are some examples:

The king of progmetal:

The best fictional metalband ever:

I recommend the tv series aswell, fun parody of metalbands in general 🙄

One of the best synth bands:

Another good Synth group:

I love when it picks up speed 🥳

One of my all time fav soundtrack songs:

I LOVE slow choir driven tracks like this! 🥳

And last but not least some psycadelic:

So If you wanna know more just let me know, got lots more to share 🥳
