

Gonna be inactive for a few days.

Posted by VooDoo - 08 Sep 2011 00:11

Okay well guys I am sick of my crappy old computer so im going to uninstall EVERYTHING and start fresh, also changing from windows XP to windows 7, so my computer will be un-usable for a few days so I will be in-active on the games/servers but I will stay active on the forums with my laptop 🙄

so, wont see you guys on the server for up-to a week im guessing...

Cya when I can 🙄

maaannn days to reinstall a puter?!?!?!? OMFG, that takes 1 to 4 hours max, uninstall? just wipe the disk, grab a dvd and thats it... geeesh, I would be dead that way.

Anyways, have a good time doing it 😊

EDIT: Do some backups first 😊
specially the steam dir!

specially the steam dir!

Well that's why i'm doing it, Windows XP is becoming less and less capable of running steam games so im re-installing all my steam games on my fresh install of windows, I'm gonna have a-lot to re-download like all my CSS modifications and all my Garry's Mod mods which is why the process will take so long, besides its done now, ive got my fresh install (I'm speaking to you from it now) quite happy on the results, my computers A-LOT faster now, shame our internet provider is bollocks but yea..

I've backed up 10GB of music, a few save game files from games, a few of my map files and such, apart from that I'm going for a complete fresh computer..

Liking windows 7 on my computer 🐦
