

Paypal help

Posted by Ncore - 08 Apr 2009 13:43

image

Your card ending in xxxx has been charged 15.00 NOK on Apr. 8, 2009.

Check your card statement in 2-3 days and find the 4-digit PayPal code for the charge.

Return to PayPal and enter the 4-digit code to confirm your credit card

Where will i find the 4-digit paypal code?

Will i get it on email? Or find it at paypal:/?

So, its like this,

You will get a bank statement (in 2-3 days like they mention), from your bank, with a movement of 15.00 NOK. The detail of the movement will have those 4 digits (Like "Paypal Charge - number 123456789" you need to go into paypal and add those last 4 digits (in the case of the example 6789).

After that they will return those 15.00 NOK to you.

Hope that helps mate.

Okey. I understand if that means that i will get the code from my bank=)

Thanks=)

Soon i can donate:D

If you have onnline banking, check the visa statment, it will be there, and yes, they will credit the 15NOK.
