Because.. its not up yet.. still being created, all of the races on the server and alot of the plugins on the server were created by our very own react 😊, so its taking some time to create.. but will be a TON less buggy than the old one and will also require less maintenance in the long run 😊

Also, react made a forum post previously with the info and password to it.

^ Correct 😊
- although there are still going to be ES/WCS crashes unfortunately ^^
