

## Problems logging into 1.6.X

Posted by Elwyndas - 14 Jul 2013 21:34

---

Been trying to log in to the server since the update to 1.6.x. Tried 1.6.1 and 1.6.2 says bad login. On the Multiuser screen it says 1.3, so what version should I be switching to? Want to connect before my faction idles me out!

---

Tried connecting with 1.6.1, it doesn't see the server, the red text says 1.3. I don't get it.

I connected no problems. now it's on 1.6.2 but there is still some work to do with some plugins.

Yeah! That worked, can log in now, thanks!

By the way, did the islands get removed? Or am I using the wrong command /island ?

Cool, ok so not abandoned then, just on hold till worked on?

That would be Great thanks.

Don't mind if I have to start over, learned a lot, like don't build out of wood cause your whole island can catch on fire, build fences early so animals that suddenly appear don't fall off and die, etc.
