

Valve does it yet again!

Posted by VoGon - 02 Feb 2010 09:58

Yup that's right!

They were able to stop all Linux servers yet once again!

Amazing how these "engineers" release these updates... FFS don't they test it on Linux????
Haven't they learned it from the last time???

Luckily we have solved it, so we're good to go, all servers should be up in a few minutes.

Apologies to all but if you want to blame someone just blame Valve

=====

Agreed, Vogon is ALWAYS the culprit! MUAHAHAHAHAHAHAHAHA 🤪

They still don't remember the fact around 90% of their server are linux bases... palhaços do kralho 🤪
