Says it on my steam anyway. The way I see it is that it is released on the 5th but pre-order gets a day head start, so on the 4th..

Friday sounds like a game evening then =)

I'm gonna wait for the final reviews first before I buy it - and I definately won't be buying it off Steam when I can get it for £25 pretty much anywhere else!

Looking forward to the new server though - should be good.

Well, good for you! Seriously I mean it. Currently you cant play MP because you cant connect to EAs game server. I can get the list of servers but get a fail message each time i try to connect. Im starting to understand what a player in Champions online said about EA rushing its products...

I hope they fix it soon, got to play it for 1 hour and i really liked it. Exept for the lack of prone =(

But prone usualy isnt in console games(they lack the extra buttons)..

But my first impression of multiplayer is real fun and I will play this a lot 🌐

Singleplayer is so damn scripted I quited it. Picture this: Im in a tower overlooking the enemy camp. In the whole camp there is only one dude. I kill him and viola, another 2 enemies step forward from behind som little wall. And my job is to take them out. When they are dead, another enemy pops up etc etc. I miss the good old freedom to finish a mission. I see many diffrent aproaches instead of script spawning...shame cause the story seemed promesing. But then again, never bought it for the SP so no real loss 🌐
