I think it's fake and it's also easier to believe that then some guy really getting hit by lightening twice.

Now is it fake or not cause if it's real then this is ubercool but if it's not it's just yea well you know 😄

its a fake believe me if u look closely to the lightning i dunno it just doesnt look like its *real* just some computer edited stuff and whell maybe a random drunk guy caught on camera i guess...

idd supa is meh 😄

*i know its some sort of double post sue me if u want! 😄

Yea, its probs all staged, the lightrain is 100% fake, real lightrain lasts longer than shown on the video and also the second bolt doesn't even flash, if you pause it on the second bolt, the world around it doesn't even light up 🤔

anyway, good attempt from the editor 🤔
, doubt I could do better

Anyhow I have proof so your going down. First ill sue you for the double posting and secondly for the damage you done to us mentally by doing something so horrible as that.

I think there were some cases when someone got hit by lightening that they still stood up. Offcourse being braindead or whatever doesn't matter they still stood up 😏
