Well, I've added games to the site

Please, if anyone interested, visit mochigames and heyzap and list the games you want to see published here.

Have fun!

(the games in the tab can be mostly sucky, I've dled them for testing'n'stuff)

Why; what?!

Having games on the site? Return value... for the moment the only thing making a return value are the forums (and I'm not talking the ads), we used to have games before and people used to play there.. so maybe having games again, people may spend more time here.

The thing I really need here is games opinions

So take visit in their sites and choose a few games you may find nice to have here!

(I must mention this is also a source of revenue)

heyzap.com/ and www.mochimedia.com/
