Welcome mate!

I noticed your chat, if you keep active around the site and mc server and also behave 😊

Just give it time, meanwhile, have fun on our server and build whatever comes to your mind!

There is also an overviewer at [www.twkgaming.com/twkworld](http://www.twkgaming.com/twkworld)

Well, it better not be right on top of where we're bulding the dragon, which is what i've been hearing -  
you are not making yourself very popular. Find your own area to develop please

And if you knew it was my project, why the hell did you think it was ok to try to take over?
