

Heaviest Map Ever

Posted by Pooky - 02 Jun 2011 17:16

Was looking around for some maps and bumped on this one :

dev.gamebanana.com/maps/154759

Most maps are between 500 kbs - 15 Mb, this baby is 119 Mb!!!! 🤔

Server which wanna host this one without a fastdll would have to wait 15 min to join or summit 🤖

lol that's just sick besides the map looks really nice made but why even make it that big. None will play it

because of the dl time 🤔
