OMG Evolution is a theory not a FACT OMFG

First, this b\*\*\*\* are americans... so, they lack the usual knowledge, second, they don't really live to know what is what, they live to feel (yea, feel) gorgeous even when they aren't.

Evolution is FACTS, religions are stories written by man to explain former unexplainable facts.

That's my point of view.

And at least, for me, when I got evolution thought in school, that was when I jumped out of catholic church, for me, was a waste of time to learn two different ways of seeing humanity and things about nature itself, and science and evolution provide (most of the times) solid facts why this and that happens.

And I'm one of those who red the whole bible... geeeeezzzz, what a waste of time, I should've red Tolkien instead, which I did, and was a lot more interesting 🍷

Now you now my religions views... ALL LIES.

Science FTW!!!!

after a week in america i can confirm, they are stupid 🤖  
best thing i say was an advert for "orlando's winningest lottery"; i loved that 🤖
