Not for nose hair.

Although I understood the part about 'intimate use' I could not find anything about this not being for nose or ear hair. I get fed up with constantly cutting myself whilst trying to cut my ear and nose hair with a pair of Kitchen Scissors, so I decided that this product would work for me. I rubbed it up into my nostrils and around the outside of my ears. Very soon the burn started and trust me it really makes your eyes water. Probably more that if it was on your knob or bollocks like the other reviewer did. If your eyes do water, make sure the product is not on your hands when you go to wipe your eyes as this porodcut also removes eyelashes and eyebrows and makes youe eyes water even more. I look like I have been put on a sunbed for too long and people keep asking me why I am crying. Still, a good product which does what it says.

lol'd! 😂
