

Zelda have some problems

Posted by slaB - 24 Aug 2008 21:17

This is a lot more fun, if you have actually played The Legend of Zelda, but to make it short, no character in The Legend of Zelda can talk with speech, it's textbased.

In this case, the shopkeeper can talk, but Link (The main character) can't. All sounds from Link's mouth is original.
