They wanted to install HAX on Counter Strike, not Counter Strike SOURCE.

But OMFG at the knife xray...

How can he survive that?

On my repost (which was actually a different link, VoGon so to you!) link it says 'a group of youths playing at an internet cafe in the province of Jilin in northern China noticed that the 17-year-old boy who was their opponent was using wall-hacks' so almost turbo, just not japan, but still pretty crazy... How the hell can someone survive that!? They also using health

hacks?
