Cards to be released Drivers

It has also fixed flickering and some other bugs in Bad Company 2.

Now, if you want to try it out on your own risk, uninstall previous drivers THEN install the 10.5 BETA. But you might want to check this out too: twitter.com/CatalystMaker/status/11651731399" onclick="window.open(this.href);return false;

A lot of people have installed this, some have experienced results and some have not.

You can download it from Megeaupload here: www.megaupload.com/?d=WH2U3WZG" onclick="window.open(this.href);return false;

Or from RapidShare:

I'll wait for the official version

The bc2 glass flikering is indeed a pain, but it's also strange that is only sometimes...
