

Alpha Protocol

This game is just awesome! First of all it is one of the first games in a while where they say SEGA! when the SEGA logo shows, like in the old days 🥳

Secondly, its VERY refreshing to play a RPG thats not fantasy or sci-fi.

Third, since it is a RPG you have choices almost all the time. There is almost no downtime. Even during conversations you need to be alert and decide what to respond.

Espionage RPG and with good voice actors and good story.

Example of choices:

As the trailer says, your wepon is choice

If you like espionage, action and stealth and a good story, this is a must play game!

So if Im a bit away this weekend, its because im working under Alpha Protocol 🤖
