Well, will take soon this one for a spin, it's based on a novel, post apocalyptic scenery and story.

I read some good things about it on the S.T.A.L.K.E.R. forums. No big complains so far.

Havnt played it myself, planned to pre-order it but Mass Effect 2 sucked me in so completly I forgot about it.. 😊

I'll review it when possible, for what I been watching and reading, the games scores quite good, since it roles in a scenary that really touches me ( and I hope never to see the thing... since now korea are to push the darned button).

Like fallout, I consider it the best game i've ever played so far, even there are quite &quot;better&quot; games like mass effect 2, post holocaust raises always my interest.

Problem is, My time is being drawn by the fact, I'm learning a new operating system for a project (hp-ux), so, little time avail to play.

Around 19th I'll be able to write a review about the game.. I hope...

still didnt get to play fallout 3. Was it any good compared to epic fallout 2?

Or was it just good on its own but not comparable?

Fallout 3 locked my attention on an 18h straight playtime 🤖

Still won't beat my record of 36 with diablo II (and I guess I never will)
