Hey people,

I've just got a new gfx card, HD 5670, and i was wondering if there are any new games out or even old ones that will look good on max gfx or are just a great game 🤔
I've played BC2 and P1, and have been since i got the gfx card, and i have to say, they're amazing 🤩
But i was woondering if anyone else had any suggestions? 🤔

Thanks in advance 🙏

try mirror edge.

Or mafia 2, or metro 2033

Hmm is Metro 2033 any good? 🤔
And played Mirror's Edge is great 🤔

Yeah Dead Space 2.... what a let down, it's a lot more scary than the first, but fails as a sequel :/
