

Crysis 2

Well, I went out and bought Crysis 2 for the XBOX 360 yesterday.

My god.

The introduction, imagine a group of soliders chatting away in a submarine waiting area, then a huge explosion takes place.. your then running/crawling through a sinking submarine filling with water.

The graphics at this point, I dribbled vastly. It's almost movie-like quality, and was well impressed.

I'm about half way through the game at the moment and I'm loving every minute of it. I honestly cannot fault the graphics/hud/gui at all. The story line could be a little better but it's definitely action packed!

9/10 from Moo!
