

hack

Posted by Grizzle - 02 Apr 2011 18:30

Hey guys at 8:28 a player called

10 "JACK" STEAM_0:1:5960013 20:43 55 1

logged on in the wcs server and he was accused of wall hacking. I spectated him and i was almost confident he was. Please check him out and he had 3 things active in console. When i told him i would get him banned suddenly he wasn't playing as good and he didn't have anything active in console. Please check him out thanks.

Hey thanks for bringing this to our attention. Please record a demo of anyone you suspect of hacking, otherwise there's not a lot we can do about it.

I have spectated Jack in the past, unfortunately if you view his profile he's been playing CSS for near enough 7 years and is active in Major league gaming, so it's a very difficult decision. If you can get a

demo of him, wall-tracing, or wall-hacking to the point of being blatant we can do something about it then
🙄

Thanks for bringing this to our attention.
