

A new pvp area in minecraft

Posted by Johannicus - 03 Apr 2011 20:37

I made a area on our server where it is now possible to do pvp battles if server rules allow it. Its basicly 2 castles facing each other. Both castles have a back door, multiple floors and digging into the castles is made idiotic with sand floors. Digging thru the castles is not allowed as I dont want my creations to be ruined. Here are some pictures to illustrate the idea:
