If you played Duke Nukem 3D then its a must buy imo. If you havnt, its just another shooter, but without those duck behind cover elements.

Duke nukem was the game I modded and mapped like hell on earth! We got to the fun point of extramegapowerfull kick and peashooting rpgs 🤔

Made a few maps for multiplayer and spent quite a few days in a row playing the damned game, it was pretty awesome!

Getting this one, of course!

Nice pics Johan!
