Terraria looks cool, but its servers only run on windows, and for me that a no-go.

We have two mc 🍷

i know a great terraria server! just go into minecraft (not terraria!) and then press multiplayer and type either:

mc.twkgaming.com

or

mmo.twkgaming.com

they are great servers!

Terraria is an epic game, I used to have my own server and it was very fun
but then I got bored

Terraria dies as soon as you either run out of trees, explore all the caves from end to end, or you get everything you can. Which doesn't take long at all

terraria stinks minecraft ftw!
but really why not just get mc for the same price and play that instead lots more things to do
