Well, looks like Europe is taking its way with new gaming software companies doing what needs to be done.

This game comes from the polish folks at Flying Wild Hog [www.flyingwildhog.com/](http://www.flyingwildhog.com/) (their site is just one of the baddies from the game and contact info)

The trailer looks very interesting and its on preoder! [hardresetgame.com/](http://hardresetgame.com/)

That looks awesome! Too bad my computer would punch me in the face if I tried to play it 😬

The game looks all right but it doesn't stand out to me amazingly 😬  
maybe it will when more trailers come out etc
