I pre-ordered it a few months ago 😞

And they said that on the beta the graphics are only 50% of the graphics the game will have once it comes out

Edit: I played the beta every day 😞

I pre-ordered it when you first could xD

And my PC can't play it, and didn't have internet throughout the Beta, and at the moment I don't have Live AND no wireless adaptor or a long enough Ethernet cable, so i'm screwed 😞
lol

Yeah, can be annoying. I had to get mine from some random out of the way electronics shop, cost £40 for 20m. Good quality though, all I can suggest is raiding all the electronics shops you see.

Me and a friend bought it. Have been playing the Beta everyday 😊
and I was a sad boy when they closed it.

But it's coming soon, 27/10 according to my sources (CDON.com where I placed my order).

My origin name is demonic_swe I think :3

It's the 25th, but that might be because I pre-ordered from origin, you get 48 hours early access, I think. Ma name on origin is PeanutAlmighty.

This is why I LOVE my tanks and Battlefield. I dont have the highest kill score but Im still on top with my score for helping others with point capturing, repairs etc.
