So i found out about this awesome game that people actaully team work at.

It is basicly an rpg shooter type of game and it is F2P(Not pay 2 win as well!) graphics look amazing, massive worlds with quick action and "Sking" and not only that it is also really fun!

So if anyone wants to play with me tell me on steam, cheers 🍻

There are games that are built for team work and people follow that like Tribes: Ascend

Also games that are built for team work and players ruind it like battlefield 🍻

also games that force you to team work like starcraft 🤖
