

Minecraft server 1.8.1

Posted by Tunes - 06 Dec 2014 00:51

Well, Minecraft is going through really hard times, after being bought my M\$, some guy issued an DMCA complaint over the server modding code, thus affecting all server modding community, as so, there are no plugins and means to mod the server into what we had before, mcmmo, no cheat, etc, etc... it's impossible.

Today I've put an 1.8.1 server open at mcs.twkgaming.com.

Weird terrain, custom mapped, vanilla, hard, all there to conquer 🤖

I'll be there a few times too, when possible, around 13h GMT and at night.

As it has no plugins, and I didn't had the time to deal with the server own access levels, it's whitelisted only for a few who ask for access rights and I decide if yey or ney access, it will be very restricted, for well known players only, 20 slots.

I'm not trying to get this community up atm, as far as maybe other stuff and services, but minecraft for the moment, at least on the public side, it's stalled, and until then, server will run vanilla.

Have fun there, see ya.

Hey, can I be white listed? Ign is 117derek. Also wondering, if it becomes possible to do mcmmo on 1.8 are you going to add it to the server? Or possibly even make another server?

Sorry, but the server is open only to very trusted members, anyone with previous bans won't be whitelisted.

May I be whitelisted? 😊
I've missed this server.

Hey guys, just checking back on the community, been a long time since the server shut down, I really miss it. oGIMPo, FroggyFace, voodoo and the rest... I would love to see the server come back with the same staff...

I remember the casino - Was so good until Matt raided it (AFriendlyPaedo not IMattR). I used to love this

server, and would love to see it again in 1.8! Thanks.

Everybody from my school used to play it xD it was so fun even though Maxmekkar10 kept griefing my bases... Still miss him though 🥰

All the memories I have of TWKgaming... Like when Gimp decided it was silent hour, and I wasn't allowed to talk... xD
