Yes it is!

I got it on normal DVD. I really liked Appleseed too!

Guess it's soon time to update my DVD library to Blue-ray when it gets more common here..

Just wanted to give a heads up to Equilibrium, great movie, but underrated...

Also seen Iron Man the other day, great if you are a fan of the comics (I am... lol).

And: Spawn that I had forgotten to mention.

Appleseed was AWESOME! God, and the 1st fighting scene, it was so f\*\*\*\*\* orgasmic! Especially when Deunan (the girl soldier) took out that minigunning cyborg! And she did it with that ridiculously big knife, in his eye!! ★
