

ZX Spectrum

Posted by Biotech - 01 Sep 2010 21:58

Dont know if this has been posted before (sorry if so) but i still think this is awesome. Got reminded by that C64 web-browser post in general chat. 🤔

what the?

1) get high

2) watch this

3) mind=blown

What strange music... doubt I would listen to that ever, unless as liger said, getting high and then listen to it.

bio sucks!

now, this is stuck in ma head 🤔
devil.

its more the idea that the entire tune has been made on a ZX spectrum 🤔
its not your everyday "ohhh lets put this on" tune no, i agree

The closest I get to such noisy data-music is this, fuc*ing epic 😊

[youtube:12dddsnw][youtube:12dddsnw]

Btw, this thread belongs in the music section 😊

well, I was high, I saw the thing... and problem... cool music

made with a currah speech synthtizer (yes, they exist) and proolly a tracker for the spectrum, yes, they also exist.

Recently I was browsing a few parts catalog, for my complete mind blowup, keyboard membranes and other precious spectrum 48k and 128k (+, +2 and +3) are still manufactured today in the UK... CRAZZY NUTTERS...

Well, needless to say, I bought a few to kick my 48k and 128k back to life 😊
