I have a feeling this is gonna go into a "the best browser" argument so i'm gonna get in there first 🤔

I like Firefox for the customisation, but Chrome is extremely fast, and IE is a pile of horse shit xD

I prefer chrome for the speed and the dev tools (although i do miss firebug sometimes)

Both have customization its just one is more mature but I think it will balance over time similarly to the android and itunes apps stores

Best browser???

I have to keep at least two open all the time... Chrome and Firefox

Opera has its features, works fine, safari also works fine, but IE... geezusss suckzzz
