hmm its not my kind of style sorry johannicus, buuut since you got old dnb songs i was wondering if you know a dnb or dubstep song where the video has lightning and in the middle of the song it has this computer crash like blue screen and annoying sounds is the best way to discribe it 🤔

i forgot the name of the song but i would very much love to listen to it once more as it was the first dnb/dubstep song ive listened to.

Well this is the earliest DnB material I own from 2001. I first got into Trance/dnB/Rave around 96-97 so this is one of my first bought records, borrowed all the other stuff. Rarely saw videos exept for the few they showed on tv, this was rare at the time. This was the time of 33,6 modems and before CS existed and 200ms was OMGBBQ you cheater!! If you didnt wanna buy something and no friends owned it you had to shoplift it to get it 🤔  
This is why I play well around 200ms in games cause I learned to play on that speed. My computer only contained one game, Diablo 1+expansion, and toke 150mb of my amazing 200mb harddrive 🤔

So, no I dont have that song =)

(Even though I guess you meant a song that you heard in more recent years) 🤔

How many dubstep fans does it take to wash the dishes?

100. 1 to wash them and 99 to talk about how dirty they were.

But to put this thread back on track, you got to add this remix:

Its just  
mind 🤔
