

Pi...

Posted by Che ken - 22 Jul 2009 03:27

---

How the japanese make maths fun! They turn Pi to the 1000th digit into a techno song sung by twins

[youtube:1sk9svar][youtube:1sk9svar]

well it is repetetive, just in different sequences 🤔

The words used are:

maru - 0

ichi - 1

ni - 2

san - 3

shi/yon - 4

go - 5

roku - 6

shichi - 7

hachi - 8

kyuu - 9

lol, still I think it's quite cool how they've made it into a little techno song (no matter how repetetive it may be)

see? my interpertration was not that far from reallity 🤔

Yes, they are a strange people, the next super powa country...

Well you are actually far off 🤔

One things for sure tho, this couldn't really be done like a song in many other languages (dought they'd try)

It goes like this:

san ten ichi yon ichi go kyuu ni roku go san go hachi kyuu shichi kyuu shichi kyuu san ni san hachi yon roku ni roku yon san san hachi san ni shichi kyuu go maru ni hachi hachi... etc (yes I just learnt the first part of the song lol)

Never tried it tbh, although when I have stayed up for 2 days playing css, and I used to play runescape with a membership until the early hours of mornings... I think I might try the free demo of WoW later lol (Ami will be pleased)
