It seems amazing as always Burton and Depp rock!

Also looking forward to the remake of this one:

Tron was the first film ever made with the aid of computers and manual film painting, cool heh, it wouldn't look weird if you had around 30 years... you know.. the world was already moving before you were born 🤔

Alice in Wonderland, is for me, one of the most psycadelic storys i've ever seen, pills to get smaller, pills to grow, vanishing pink cats. the tea time,humpty dumpty, you name it.

I'm eager to see both.

Tron is a programmer get's inside the matrix by digitalization, you should seek it on the regular shares. Beware, it was filmed in black and white 🤔
