Well, for long time in my life, sometimes i dig into time lapse and stop motion stuff, this is a small experience I made with no preparation, just mounted the camera, vaio time lapsing, some random music, done 🤖

[youtube:14qebzvb][[/youtube:14qebzvb]

And I know, its kinda boring 🤖

Not THAT boring. The music made it relaxing =)

Its kinda cool to see how it changes..

Now all you need is to project that on screens instead of windows and you can decide what weather you want outside when your indoors 🤖

The music was made almost in the momment 🤖  
Thanks for the nice review.

There are other things I can do with this kind of technique, but require decent weather, when ready, you'll know about it.
