

Signature help please :P

Posted by VooDoo - 22 Apr 2011 00:42

Well, I've made a sexy new signature but have no idea how to edit my signature, I cant remember how I did it in the first place and now I cant remember how to change it, can anyone give me a hand and tell me what I click on to change it 😊

NVM, i found it (but my signature always seems to come out tiny 😊
, so I kinda still need help ROFL..

Thanks for any answers in advance

It could be the number of pixels your signature contains or the DPI of the image you used in photoshop, if you saved it as a PSD before you officially saved it, change the DPI to about 150 (300 will turn out FAR too big lol)

Also, If its huge the forum may have shrunk it.

Looks good though :p
