I sighed there - \_-&quot;

And yeah, nobody knows, probably only vogon does, since he was the grafs guy. Or maybe even someone before that ... No clue

Lastely : moved the topic, was in &quot;hello!!&quot; section..

your outta luck on this one voodoo, dug around on the forums a bit and turned out its a custom font made by niLdesperandum (never heard of the guy, but the topic was started 2 years ago), if you wanna look at it its on either the 3rd or 4th page on the graphics and design section titled twklogo anyone or something in that line.

sorry 🤔
