Portfolio Website.

Posted by niLdesperandum - 24 Mar 2009 21:29

_____

Hey guys, I was just wondering if anyone had access to templates/css styles/code that I could utilize while designing a new web-based portfolio?

I'm not exactly a wizz with anything web-design based, and I just need a helping hand. I've got quite a few ideas with respect to how I want the site to look, but don't have the know-how to implement them. I've been trying to get aquainted with dreamweaver again over the last few days, and it's not proving easy to develop some more advanced design features.

Anyway, any help you guys could give me would be awesome.

_____

[www.youarenotoriginal.co.uk"](www.youarenotoriginal.co.uk) onclick="window.open(this.href);return false;

1.0 of my portfolio/mini-blog, learnt a lot making it and there's still many a gap in my html knowledge to be plugged. Let me know what you think anyways 😊

yussyuss, I originally used pop-ups, but the obvious popup-blocker issue arose. I want the original site/index to stay open all the time, so that was the easier way

Looks very cool. Good work!

The opening in new tabs is a wee bit annoying though. Its just as easy for the end user to click back. Or even put a home page button on all pages
