I couldnt get my screenshot to work, pressed the button but no no..

So here is the image I have. I have it centered with black above and below for effect. Basicly it looks like a "mailbox" view of a paused movie. I have 4 icons in the upper left corner along the side. Thats it, i like it simple and the wiew is to good to be ruined by lots of icons anyway..

If I get it to work I will post a proper image later on 😊
