a little tip that is used in css videos that i feel would also work in a wow video is sinking the movie to the song. Makes the feel of the movie alot more smooth and easy to get into. If sourceradio.com was still up, i would suggest checking out some of the videos on there and steal some of their techniques etc. Very good for a first attempt though. 🍌

Machinima are great for vid making and imo one of the best groups to look at if you want vid making tips.
Another of the classics is [strike for kids](#)[/url/ 🤔

Looks good, did fraps and/or sony vegas cost much?
