The resolution is too large too see it full size without clicking download (Should open it in a new window)

garyparsons.deviantart.com/art/Floating-...rock-141284319"
onclick="window.open(this.href);return false;

This was mainly photo manipulation with an epic fail by me (Lighting on the rock)

Used a few tutorials to help me on this one 😊

Cool image, digg it 😊

Would have been awesome with some flames in the dragons mouth, I think.

Yeah man, really cool, prolly you can post also some components you used to make it, and yeah.. the rock is misilluminated...

Great work!
