Hey Guys,

Been asked to do a website for one of my uni modules (in a team \*sigh\*) and we have a great yet simple flash idea for the site. Well I say simple but hell I don't know where to start with flash 😊

Any ways if anyone thinks they maybe able to help (even if its an idea of how we could get from the start image to the end)

Start Image: will sort link

End Image:will sort link

The End image is just the Logo with the dotted line not all the jaff around it 😊

Thanks in advance for any ideas or the holy grail of someone loving me enough to have a bash 😊
