If your jump lists disappear
Posted by liger - 23 Jul 2010 09:33

_____

1. Uncheck in CCleaner (if u use it)

2. try this

This process erases all the pinned items on all of your programs (you'll have to pin them again afterwards), but the functionality of the windows explorer jumplist will return to normal.

1. Delete all files at %APPDATA%MicrosoftWindowsRecentAutomaticDestinations

2. Delete all files at %APPDATA%MicrosoftWindowsRecentCustomDestinations

3. Reboot

4. Re-pin all the items you wish

_____

happened again :/

its enough to delete the biggest files there (>1MB)
