

Concerned your pc can be hacked?

Posted by liger - 19 Feb 2011 14:02

Dont be, it already has been hacked -.-

Read: arstechnica.com/tech-policy/news/2011/02...r-the-government.ars

bait: According to Hoglund, the recipes came with a side dish, a specially crafted piece of malware meant to infect Al-Qaeda computers. Is the US government in the position of deploying the hacker's darkest tools—rootkits, computer viruses, trojan horses, and the like? Of course it is, and Hoglund was well-positioned to know just how common the practice had become. Indeed, he and his company helped to develop these electronic weapons.
