Anyone seen this?

tversity.com/

Lovely piece of software. Got my whole computer library streaming to my picky PS3 which only plays certain formats. TVersity does the encoding on the fly straight to the PS3. And it works extremely well, and looks great.

Nice. I'll try it.

BTW: Anyone can watch .MKVs (H.264) on the PS3 ?

WoW!

Looks like the sweet thing to see stuff on my Wii 🍷

Nice find.. I'll try it too 🍷
